Tags:	Calculator

Subject	Decimal separator button not working
Priority	Critical
Description	According to the app specification the button “.” be usable for operations but it has no function right now
Reproduction	<ol style="list-style-type: none"> 1.Open the calculator app 2.Push the button “0” 3.Push the “.” button 4.Push the “5”
Expected Result	The displayed value is 0.5
Obersrved Result	The displayed value is 5
Additional Informations	
App Version:	0.0.1
Tags:	Calculator

Subject	Operations are not executable as specified
Priority	Critical
Description	The specification of the app says that the user can enter operations like “10 + 2 - 5” but when the user does this the part “10 +” is removed. Also the result should be displayed when the user pushes the “=” button, so it should be possible to enter equations and the push the “=” button.
Reproduction	1.Open the calculator app

	2.Push the button "1" 3.Push the "+" button 4.Push the "2" 5.Push the "-" button 6.Push the "3" button 7.Push the "=" button
Expected Result	The displayed value is 0
Obersrved Result	The displayed value is -1
Additional Informations	It seems the first part is removed as soon when the second number and the second operator are entered
App Version:	0.0.1
